General Information

Pricing:

Please contact your local representative for a formal quote. **Expedite** options are available for an additional fee.

Molding Capabilities:

The tests listed are applicable for standard thermoplastic materials. Other material types must be approved by the Materials Lab Manager. We have the capability to test materials up to melt temperatures of 380°C and mold temperatures of 200°C.

Shipping:

Shipping of resin is to be arranged and paid for by the customer. We recommend shipping via FedEx, UPS, DHL, or other International Shipper to reduce issues with customs clearance. BAP is not liable for any import tax or duties incurred.

Shipping of molded test specimens will be arranged and paid for by Beaumont, except in the event of international shipments. For international shipments, the customer must provide a shipping account.

Materials originating within USA require:

- Completed Material Characterization Order Form;
- English version Material Safety Data Sheet (MSDS).

Materials originating outside USA require:

- Completed Material Characterization Order Form;
- Commercial Invoice (please quote a nominal value for customs purposes only);
- English version Material Safety Data Sheet (MSDS);
- Toxic Substance Control Act (TSCA) Declaration

Delivery:

Delivery times are dependent on laboratory workload. Expedite orders are evaluated upon request and availability is dependent on laboratory workload, material type, etc. A confirmation of delivery date will be sent to the customer upon receipt of the material and other prerequisites.

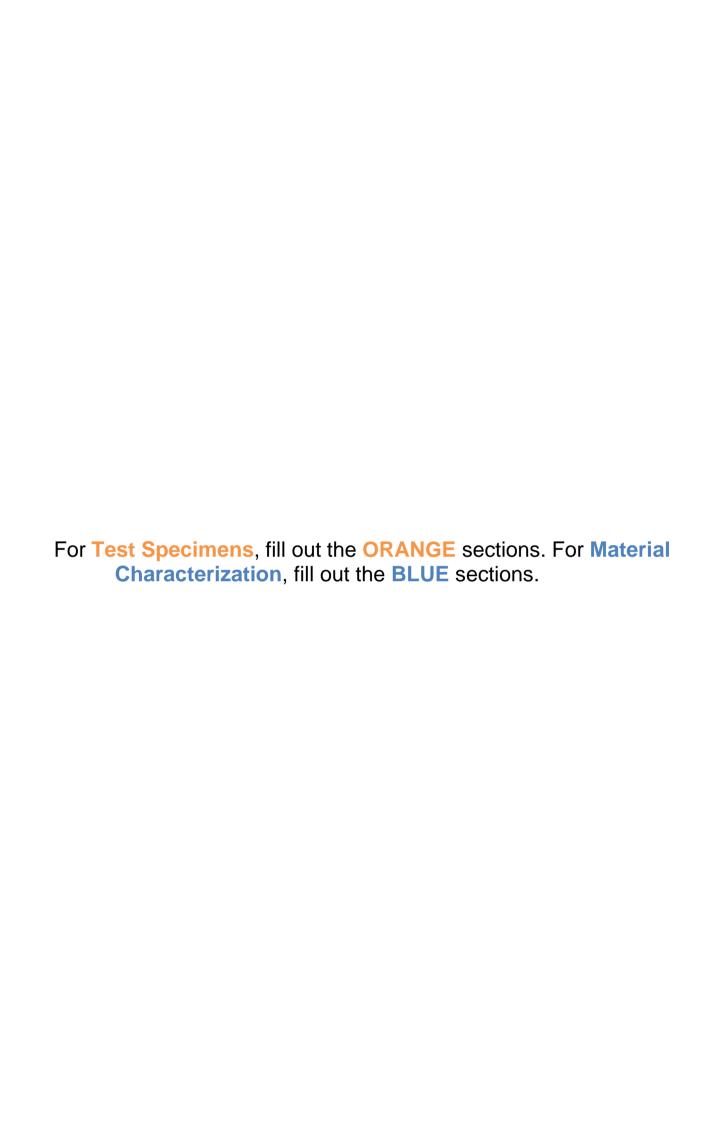

Confidentiality Policy:

Non confidential characterized materials will be included on the Public Material Database (subject to the approval of the resin manufacturer) and are available to all customers.

<u>Confidential testing is available for an additional fee.</u> Information or data pertaining to Confidential materials will not be released without the written consent of the customer who ordered the testing. **Confidential Moldflow material data is subject to being shared with Autodesk in order to maintain CRIMS data for new releases.**

Code	Test Description	Material	Select
MPL-001	Confidential Testing Data will not be added to the Public Material Database.	-	
MPL-110	Autodesk Moldflow Filling Includes: Shear Viscosity, Specific Heat, Thermal Conductivity, Mold Validation. Supplemental Data: PvT and Mechanical, unless provided by the customer.	25kg	
MPL-125	Autodesk Moldflow Filling and Packing Includes: Shear Viscosity by IMR, Specific Heat, Thermal Conductivity, PvT, Mold Validation. Supplemental Data: Mechanical. Supplemental Data: Mechanical, unless provided by the customer.		
MPL-130	Autodesk Moldflow Filling, Packing, Shrinkage and Warpage Includes: Shear Viscosity by IMR, Specific Heat, Thermal Conductivity, PvT, CLTE and Mechanical, Mold Validation. (NO CRIMS/STAMP)	40kg	
MPL-135	Autodesk Moldflow Filling, Packing and Shrinkage Includes: Shear Viscosity by IMR, Specific Heat, Thermal Conductivity, PvT, Shrinkage Analysis (CRIMS/STAMP), Mold Validation. Supplemental Data: Mechanical, unless provided by the customer.	50kg	-
MPL-150	Autodesk Moldflow Filling, Packing, Shrinkage and Warpage Includes: Shear Viscosity by IMR, Specific Heat, Thermal Conductivity, PvT, CLTE and Mechanical, Shrinkage Analysis (CRIMS/STAMP), Mold Validation.	50kg	
MPL-185	MIM/PIM/CIM Includes: Shear Viscosity by Capillary Rheometer, Thermal Conductivity, Specific Heat, PvT	2kg +Molded Part**	
Therma-flo	Polymer analysis method and software that measures and displays the material properties of a plastic melt in actual molding conditions.	15kg	
Code	Individual Testing Add-ons (Not included in any standard package)	Material	Select
MPL-410	Viscoelasticity for Birefringence Viscoelastic properties used for the Birefringence model tested by Autodesk Moldflow Plastics Labs in Australia (customer supplied Stress Optical coefficient and refractive index of the unoriented melt)	5kg	•
MPL-420	Crystallization Crystalline kinetic properties tested by Autodesk Moldflow Plastics Labs in Australia	2kg	
MPL-036	Pressure Dependent Viscosity by IMR Characterizes the Cross-WLF model with the D3 coefficient. Must be ordered with MPL-035 or a test containing MPL-035.	5kg	
MPL-037	High Shear Viscosity by IMR Extremely high shear rates in additional to the standard shear rate profile. Must be ordered with MPL-035 or a test containing MPL-035.	5kg	
Code	Individual testing (Included in most standard packages)	Material	Select
MPL-013	pvT (Pressure – Volume – Temperature) Understanding the relationship of specific volume to pressure and temperature conditions	5kg or Molded Part**	
MPL-032	Shear Viscosity by Capillary Rheology Requires thermal data to process result; customer supplied or ordered.	2kg	
MPL-035	Shear Viscosity by IMR Requires thermal data to process result; customer supplied or ordered.	10kg	
MPL-050	Specific Heat DSC thermal scan including multi-point Specific Heat, Transition Temperature and Ejection Temperature.	2kg	
MPL-056	Thermal Conductivity Transient Plane thermal scan evaluating multi-point Thermal Conductivity	5kg or Molded Part**	
MPL-205	Shrinkage Autodesk Proprietary testing fit to the CRIMS/STAMP model. Requires filling and packing data to process result; customer supplied or ordered.	25kg	
MPL-355	CTE and Mechanicals Molding of Mechanical Plaques to test, CLTE (Longitudinal & Transverse), Elastic Modulus (Longitudinal & Transverse), Shear Modulus, Poisson's Ratio (Longitudinal	15kg	

^{**}Molded parts need to be roughly 3.2mm thick and larger than 50mm in diameter.
